# THE NOTTINGHAM SYMPOSIUM

## Highway Maintenance in a Brave New World

### Theme

It is said that necessity is the mother of invention. This symposium will explore the inventive ways that highway finances can be used to maximum effect, both nationally and at a local level. The practicalities of potholes, surface treatments and recycling will also be addressed by specialists, showing that even a limited budget can be used to achieve very real benefits.

### Speakers

This symposium brings together key voices, both local and national, with responsibility for optimising usage of highway budgets, as well as technical experts, each of whom has enormous experience and knowledge of the latest innovations in highway repair, preservation and strengthening.

### Venue

The symposium will make use of the excellent facilities at the Newton Building, on the Nottingham Trent University City Campus at the heart of Nottingham City Centre. The Victoria railway station, the Broad marsh bus station and the Forest park & ride (NG7 6AQ) are only fifteen minute walk or a short tram journey away.

### Nottingham Trent University

Tel : +44 (0)115 941 8418

### Cost

The delegate rate for attendance at the Annual Symposium is £45 for members, £55 for non-members, including VAT. This covers lunch, afternoon refreshments and printed summaries of the papers presented.

### Exhibition

There will be an opportunity to exhibit products and services at the symposium. Please contact Mujib Rahman on 01158486502 or email: [mujib.rahman@ntu.ac.uk](mailto:mujib.rahman@ntu.ac.uk) for further details
