

The **RSTA and Road Emulsion Association (REA)** held an online webinar, hosted by the IAT in 2021, to inform attendees of the necessity and benefits of applying Bond Coats.

The webinar, *The Importance of Interlayer Bonding in Pavement Construction* – delivered by Gary Schofield on behalf of the Road Emulsion Association (REA) and the RSTA was attended by 170 delegates.

The webinar highlights included:

1. The difference between bond coats and tack coats.
2. How bond coats reduce the risk of surfacing premature failure.
3. Why the topic is so important to ensure the planned life of the pavement is achieved.
4. How interlayer bonds effectively spread the stresses from traffic.
